AUDIT MILL

The result of this audit report is to **verify the Quality System of manufacturing**, in which all the processes are recorded and valued items as production control, documentary, test records, manufacturing test and product testing. BUROTEC add value and experience according to ISO standards.

CONSULTANCY

Management systems allow companies to develop their work with the highest quality standards, prioritizing resources and optimizing their processes. These improvements reflect on profitability for the organization. BUROTEC helps companies implanting **ISO 9001, ISO 14001, OHSAS 18001** among other. Our auditors are required for their experience and high quality services. We also provide product certification for international market trade, such as CE Marking, for the European Economic Area and other useful Quality Marks

ENGINEERING

We have 30 years of experience in several engineering areas: Industrial engineering projects, image engineering, licensing and regulatory management, topographic georadar studies... We aim to execute **integrated management of your project**. BUROTEC provides a very competitive price-quality offer, which includes intense communication and integration with each client's needs.

OUR INTERNATIONAL NETWORK

In a global economic context, BUROTEC international presence grows every year. Our company provides services all around the world, creating a valuable international network that improves our mentality and the quality of our work. We develop our services within an international network of inspectors, combining local knowledge with global approach. Our aim to expand our business leads us to a better way of understanding and solving our clients' needs
